Subject: Bird Kills due to Wind Turbines

I have read the comments on the 2005 Integrated Energy Policy Report with respect to "Assessment of Avian Mortality from Collisions and Electrocutions." I view this has a threat to our bird life fully as deadly as DDT ever was. Please do not proceed with approval of any more wind energy facilities! We can gain much more from a conservation campaign without destroying our biological and visual resources. Where is the governor when we need him to lead a campaign for conservation of electricity? Out driving his hummer?
